

Lumizo Docs

Create a modern web application called **Lumizo Docs** inspired by the simplicity, speed, and usability of iLovePDF and SmallPDF.

Project Overview

Lumizo Docs is a collection of free business document generators that help users create professional business documents instantly and download them as PDF files.

The application should focus on:

- Simplicity
- Speed
- Mobile-first design
- SEO optimization
- Google AdSense monetization
- Professional business document templates
- Fully client-side architecture

Users should be able to:

1. Open a generator page
2. Fill out the form
3. Preview the document in real-time
4. Generate PDF
5. Download or print immediately

No login required.

No account required.

No subscription required.

No backend required.

Everything should work directly in the browser.

Tech Stack

Use:

- Next.js 15 (App Router)

- TypeScript
- Tailwind CSS
- shadcn/ui
- Lucide React Icons
- React Hook Form
- Zod Validation
- PDF-lib (preferred) or jsPDF
- next-themes

Do NOT use:

- Supabase
- Firebase
- Authentication
- User Accounts
- Dashboard
- SaaS Features
- Backend Database

The application should be deployable directly to Vercel.

Main Generators

Create the following generators:

1. Invoice Generator
2. Quotation Generator
3. Receipt (Kwitansi) Generator
4. Delivery Order (Surat Jalan) Generator
5. Packing List Generator

Each generator should have its own route and SEO landing page.

Homepage

Design inspiration:

- iLovePDF
- SmallPDF
- Canva Tools

Hero Section

Title:

Lumizo Docs

Subtitle:

Create professional invoices, quotations, receipts, delivery orders, and packing lists in seconds.

Primary CTA:

Start Creating Documents

Secondary CTA:

Browse Tools

Tool Grid

Display five main tool cards.

Each card should contain:

- Lucide Icon
- Tool Name
- Short Description
- Open Tool Button

Tools:

- Invoice Generator
 - Quotation Generator
 - Receipt Generator
 - Delivery Order Generator
 - Packing List Generator
-

Global Layout

Create:

- Header
- Footer
- Responsive Navigation
- Tool Grid
- FAQ Section

- SEO Content Section
- Related Tools Section

Fully responsive:

- Mobile
- Tablet
- Desktop

Company Profile

Create a reusable Company Profile page.

Route:

/company-profile

Store all data using Local Storage.

Fields:

- Company Name
- Company Logo Upload
- Address
- Phone Number
- Email
- Website
- Tax ID (NPWP/NIB)
- Signatory Name
- Signatory Position
- Signature Upload

Features:

- Save Profile
- Update Profile
- Delete Profile
- Export Profile JSON
- Import Profile JSON
- Auto-fill Across All Generators

The company profile should automatically populate document generators.

Invoice Generator

Route:

/invoice-generator

Invoice Information:

- Invoice Number
- Invoice Date
- Due Date

Customer Information:

- Customer Name
- Company Name
- Address
- Phone Number
- Email

Items:

- Item Name
- Description
- Quantity
- Unit Price

Automatically Calculate:

- Line Total
- Subtotal
- Discount Percentage
- Discount Amount
- Tax Percentage
- Tax Amount
- Grand Total

Additional:

- Notes

Actions:

- Add Item
- Remove Item
- Live Preview
- Generate PDF

- Download PDF
- Print
- Reset Form

Output:

Professional A4 Invoice PDF

Quotation Generator

Route:

/quotation-generator

Quotation Information:

- Quotation Number
- Date
- Valid Until

Customer Information:

- Customer Name
- Company Name
- Address
- Phone Number
- Email

Items:

- Product / Service Name
- Description
- Quantity
- Unit Price

Automatically Calculate:

- Line Total
- Subtotal
- Discount
- Tax
- Grand Total

Additional:

- Scope of Work

- Terms and Conditions
- Notes

Actions:

- Add Item
- Remove Item
- Live Preview
- Generate PDF
- Download PDF
- Print

Output:

Professional A4 Quotation PDF

Receipt Generator

Route:

/receipt-generator

Fields:

- Receipt Number
- Date
- Received From
- Amount
- Payment Method
- Payment Purpose
- Notes

Automatically Generate:

- Amount In Words

Actions:

- Live Preview
- Generate PDF
- Download PDF
- Print

Output:

Professional A4 Receipt PDF

Delivery Order Generator

Route:

/surat-jalan-generator

Fields:

- Delivery Number
- Date
- Sender
- Receiver
- Delivery Address
- Courier
- Vehicle Information

Items:

- Product Name
- Quantity

Additional:

- Notes

Actions:

- Add Item
- Remove Item
- Live Preview
- Generate PDF
- Download PDF
- Print

Output:

Professional A4 Delivery Order PDF

Packing List Generator

Route:

/packing-list-generator

Fields:

- Packing List Number
- Date
- Shipper
- Consignee
- Related Invoice Number

Items:

- Product Name
- Quantity
- Weight
- Dimensions

Automatically Calculate:

- Total Quantity
- Total Weight

Additional:

- Notes

Actions:

- Add Item
- Remove Item
- Live Preview
- Generate PDF
- Download PDF
- Print

Output:

Professional A4 Packing List PDF

PDF Templates

Provide 3 professional templates for all document types:

1. Modern
2. Professional
3. Minimal

Features:

- Company Branding
- Logo
- Signature
- Clean Layout
- Print Optimized

Save selected template using Local Storage.

Live Preview System

Every generator should include real-time document preview.

Desktop Layout:

- Left Side: Form
- Right Side: Live Preview

Mobile Layout:

- Form First
- Preview Below

Preview updates instantly as users type.

Local Storage

Persist:

- Company Profile
- Selected PDF Template
- Theme Preference
- Last Used Form Data

Auto-load data when users revisit the site.

SEO Requirements

Create optimized pages:

- /invoice-generator

- /quotation-generator
- /receipt-generator
- /surat-jalan-generator
- /packing-list-generator

Each page should include:

- Tool Interface
- Introduction
- Benefits
- How To Use
- FAQ
- Related Tools

Implement:

- Dynamic Metadata
- Open Graph
- Twitter Cards
- JSON-LD Structured Data
- XML Sitemap
- Robots.txt
- Canonical URLs

Blog Section

Create:

/blog

and

/blog/[slug]

Blog categories:

- Invoice Guides
- Quotation Guides
- Receipt Guides
- Delivery Order Guides
- Packing List Guides
- Small Business Tips

Provide reusable blog page templates.

AdSense Preparation

Create reusable ad components:

- AdPlaceholderHorizontal
- AdPlaceholderVertical
- AdPlaceholderInline

Homepage Placement:

- Below Hero
- Above Tool Grid
- Below Tool Grid

Generator Pages:

- Below Generator Form
- Before FAQ
- After Related Tools

Blog Pages:

- After Introduction
- Mid Article
- End of Article

Do not include real AdSense code.

Create placeholder components ready for future integration.

Design Requirements

Style:

- Clean
- Minimal
- Fast
- Professional
- Modern

Inspired by:

- iLovePDF
- SmallPDF
- Canva Tools

Requirements:

- Responsive Design
- Smooth Animations
- Accessible Components
- Consistent Spacing
- Lucide Icons

Support:

- Light Mode
 - Dark Mode
-

Architecture

Use a scalable feature-based structure.

Separate:

- Components
- Features
- PDF Templates
- Hooks
- Utilities
- Types
- SEO
- Layouts

Create reusable form components that can be shared across generators.

Deliverables

Generate a complete production-ready Next.js application including:

- Full folder structure
- Responsive layouts
- Reusable components
- 5 document generators
- Company Profile system using Local Storage
- Real-time document preview
- PDF generation system
- 3 PDF templates
- Blog structure

- SEO optimization
- AdSense-ready placeholders
- Light and Dark mode support

The final application should be ready for deployment on Vercel without requiring any backend services.
